SEBASTIÁN ANDRÉS ASTROZA AGUAYO

Software Engineer | Full-Stack, Systems, Data & Applied AI

Santiago, Chile | sebastroza10@gmail.com | linkedin.com/in/sebastian-a-677745276
github.com/sebastroza1 | sebastroza1.github.io

PROFESSIONAL SUMMARY

Early-career software engineer with professional experience across full-stack delivery, Linux infrastructure, QA, automation and data integrations, complemented by independently validated engineering labs in applied AI, distributed systems and observability. Builds inspectable, documented software with explicit evidence boundaries; open to international and relocation opportunities.

PROFESSIONAL EXPERIENCE

AutismoConecta — Software Engineer — Cross-functional IT | Sep 2026–Present

- Contribute across full-stack development, Linux infrastructure, databases, automation, security, external integrations, administrative systems, QA, deployment validation and incident diagnosis in a Chilean social-impact technology context.
- Documented owner-provided local p75 evidence after web optimization: DOMContentLoaded −42.7%, First Contentful Paint −40.3% and initial bundle −34.4%; measurements are local, not real-user field data, and do not establish individual commit authorship.

TRC Recruitme — QA, Automation & Data Integrations | Aug 2025–Mar 2026

- Supported technical, professional and university placement periods followed by continuity under contract; individual placement dates are not claimed.
- Worked on data extraction and transformation, Dropbox CV migration, import templates, n8n workflows, webhooks, chatbots, Selenium, Postman, Scrum and technical documentation.
- Owner-reported delivery: completed a migration task estimated at one month in approximately one week.

TECHNICAL SKILLS

Software: Python, PHP, JavaScript/TypeScript, Laravel, Angular, Next.js, Vue 3, FastAPI, REST APIs, C#, Java, Flutter
Systems & DevOps: Linux, Nginx, PHP-FPM, Docker, Git, GitHub Actions, CI/CD, Bash, PowerShell, networking, observability; Kubernetes coursework and labs
Data: PostgreSQL/PostGIS, MySQL, SQL, Firebase/Firestore, ETL, geospatial data, Pandas, NumPy
Quality & AI: pytest, Selenium, Postman, Playwright, web performance, PyTorch, TensorFlow/Keras, scikit-learn, MLflow, OpenCV

SELECTED PROJECTS

LandFinder Chile | Vue 3, FastAPI, PostGIS, Leaflet: Private work in progress implementing geospatial search, comparison, provenance-aware public-data connectors and deterministic territorial scoring; not deployed and not presented as a completed MVP.
Collaboration Operations Lab | Python, Microsoft Graph/Entra concepts: Public reconciliation lab with dry-run defaults, idempotent planning, least-privilege documentation and tested failure paths. Repository
ML Model Serving & Operations | FastAPI, Docker, Prometheus: Reproducible inference API with validation, health/metrics endpoints, tests and operational runbooks. Repository
Scientific Anomaly Detection | PyTorch, scikit-learn: Synthetic scientific-signal pipeline with deterministic generation, evaluation and clearly stated non-production limits. Repository
C++ File Integrity Toolkit | C++17, CMake: Portable hashing and integrity-verification workflow with tests and CI evidence. Repository

EDUCATION

Universidad Central de Chile — Civil Engineering in Computing and Informatics | Academic requirements completed 2026; formal degree conferral pending institutional confirmation. Teaching-assistant experience in Physics and Probability.

NeuroFAST | Selected for the first national stage of UDD Impacto Emprendedor 2026 and participated in formative activities; no competition win or clinical validation is claimed.

CERTIFICATIONS

EF SET English Certificate — Global C1, Oct 2026 (credential: cert.efset.org/m27XNx) | LFS158: Introduction to Kubernetes — The Linux Foundation, Oct 2026 (course completion, owner-provided)

LANGUAGES

Spanish — Native | English — Global C1 | French — Beginner | Portuguese — Basic
